COMMUNITY RISK REDUCTION

Community risk reduction (CRR) has taken center stage in the fire service, promoting your mission and focusing on the safety and protection of your community and crews.

If you already know Infinite Command's extraordinary platform for fire administrators, operations, and response, or its vital role in preparedness, prevention & planning, you won't be surprised by its innovation and leadership in the practical and meaningful aspects of your CRR programs.

Let Infinite Command help you identify & prioritize needs, plan and track progress, or analyze, adjust and measure outcomes!

Infinite Command
Reduce Risk - Improve Safety

5) Monitor > Evaluate > Modify Plan

Constant reassessment and tweaking are necessary to ensure best use of resources and efficient/effective CRR

Analyze interventions, efforts, and results. When applicable memorialize modifications in the plan including why, how, expected results and any new/ongoing performance indicators.

1) Identify & Prioritize Risks

Observe & predict community risks, quantify practicality and benefits of intervention, prioritize program attainability & impact.

Infinite Command is a valuable source of information to explore, discover, and prioritize needs.

4) Implement the CRR Plan!

Activate the CRR plan: set tasks into motion including stakeholder assignments, expectations & responsiblities

Schedule & track interventions, activities, efforts, events, education & trainings. Log impacts on community members, as well as applied incentives & enforcement actions, and even track installs/giveaways.

2) Develop Mitigation Strategies/Tactics

Gather stakeholders to collaborate on strategies & tactics & 5-E's necessary to achieve desired outcomes.

Manage dated & categorized CRR-program meeting note. Match how plans & actions specifically affect desired outcomes.

3) Prepare the CRR Plan

Memorialize your plan (stakeholders, 5-E's, strategies, tactics, status, milestones, goals, performance indicators).

Document ALL plan details in Infinite Command including specific performance measurements.
